Abstract

As an indicator to nations economy development the GDP (gross domestic product) has an important influence to the economy level, quality aspects etc., so the comparing with other continents will have a significant meaning continuously by scientists who publish their latest achievement at the high impact-factor journal within a periodic time. We should look at the paper through internet web site even we can download the article for seeing later for the sake of erecting reading habits and information from there. Thereby, the one in journal will become a bridge connecting the readers and authors where the new method, approach may be seen by us. So that the high-technology product is able to be produced with those innovation method accounting for certain meaning new products which may stimulus the presently searching and producing ones because there is so thorough investigation to one property. We should continue to process those key parameter searching activity so that new functional product enables to be created in light of insistence and resilience measures. On the other hand, new quality productivity will be pushed from laboratory to industrial business like photovoltaic one, vehicle battery, hydrogen fuel etc. field, which may increase the corresponding industrial substitution those old energy usefulness for new quality energy. All of them may form the new industrial innovation with new transiting energy product which occupies the industrial production more and more. In future those new energy like generating the electrical amount has to dominate more ratio in GDP value. We must rapidly and urgently promote the new quality productivity from university lab to institution and industrial business for the sake of transforming the innovation energy into society quickly. On the other side, the more attracting the excellent talents from overseas university, institution & industry business will be done by us from now on. In light of News report the China R & D (research & development) investment ratio is gradually increasing year by year, so there is more chance and good equipment can match to proceed the new high-tech product preliminary investigation and promotion by recruiting others like USA top scientists who can transfer the USA top technique to China. We should go on processing those talents turn-back work from famous university etc. in abroad like USA accounting for new environmental formality to become the leadership role now.

Keywords: innovation; search for; top continent nation; GDP; scientist & talents; academy conference; sustainability; trillion Yuan GDP Cities in China; Chugai Pharmaceuticals

1. Introduction

The nations & regions GDP will represent their comprehensive strength in views of economy level and quality, so searching it may have an important effectiveness for us to process statistic with the national producing amount every month, season and year. In the meantime, the value with y-y has also a significant meaning that reflects the economy growth step because we should clarify the increasing change so as to evaluate the increasement and declination value preciously. The positive y-y value may mean the good and rapid economy developing status whilst the minus one may state the bad and slow economy step. So we judge the economy developing enhancement and decrease through that y-y value for a certain period. Thereby, the detail discussion will include in the following aspects. The GDP which indicates national economic status has provided an important role in every aspect in the world. So that the population increasing rate would be maintained for the sake of raising high-technique product with the entire industrial chain constantly which might enhance our new-quality-productivity. Hence we should consider the effective factors for example the population quantity, new quality productivity with high-technique etc. like big plane electric vehicle battery AI robot quantum computer medicine making disease diagnosis AI (artificial intelligence) ocean source space exploration nuclear generator etc. other ones. Low population is enable to offer high life & quality with improving GDP per capita value. Meanwhile, it can enhance the national whole GDP value and help us to boost the economic recovery and many things to do. So the certain population is about to improve our national confidence some degree and make us to become priority one as early as possible even the super-country to lead the world to leadership right.

In contrast, the GDP increasing rate may play a significant role with regulating population increasing rate mutually and cooperatively. Hence the two aspects may be emphasized and paid attention to in thriving the whole national economic developed degree through enough wielding our generations positively and efficiently by our government institution endeavor and evaluation. For the sake of making relevant policies and allocating capital into the necessary industries the corresponding strategic plan needs to be made under various background and entities. Then the according monitor and estimation will be followed and estimated periodically and frequently by the observer in government's institution. At last as to the developed speed in one nation the corresponding population increasing quantity and high-technique product producing will be discussed and considered more preciously and correctly according to the near past years experience and variation.

Therefore, the high-technique products will be completed through wielding our scientist & senior Engineers coordination tightly for the sake of reviving the industrial and tertiary modernization. We should constantly look for and seek the new quality productivity sustainably so as to take place of our traditional industry becoming modernity. An innovation industry like new energy electric generator will be in front of our path forwards, so that the corresponding tactic must be put up and seek the opportunity and fortune in order to burden our responsibility quickly and not to forget recommend the fitting one to appoint new occupation. Like the Bole identified horse or Maosui self-recommended the recommendation will be represent one aspect for our human resource department to consider and evaluate the recommended included a full research room with a set of computer high-technique instrument & device, subordinate, subsidiary staff, salary, house,

welfare etc. a series of work so as to appoint his new occupation reasonably and willingly. [1~20]

2. Discussions

The enhancing GDP behaviors will be meaning regulating the one for matching new dynamic balance according to exhibiting new tendency like War, disease and political fringe conflict which affect our life for a certain economic developing degree. So that the judgement may be according to the met actual situation making a corresponding method like increasing & decreasing this year or next one anticipating value so as to alleviate the nation burdens. Thereby, the fitting value may be satisfying the domestic consumption demands in order to rise up the positive consumption that will help us to go through the difficult situation when the risk happen. On the other side, the foreign trade will be encouraged so that the exportation win the importation for the sake of acquiring corresponding foreign reservation that is to be essential in critical period like when we buy some necessary goods abroad like military and defence weapon and equipment when we meet difficulty. Presently the high-technique product like drones and low air economy demands us to wield more powerful role in delivering the package and taking-out brisker and quicker that enable form the automatic and artificial intelligence service in big cities completed by robots from the reserve-box to each floor offices directly. So we look at the convenience and security. We should continuously to search for the new automatic & artificial intelligence robot work function special in the humanoid ones. [21~26]

2.1 The GDP comparison between Africa top nations & Chinese Guangdong province

The GDP comparison between Africa top nations & Chinese province showed 4.3%~20.5% y-y value in 1995 by South Africa~Chinese Guangdong provinces explained the Chinese Guangdong province most forwards economy development step. The GDP value showed 168~88 billion dollars by them accordingly to express the South Africa strong economic strength in 1995.

Figure 1. The GDP comparison between Africa top nations & Chinese province. [1]

At the same time, the GDP comparison between Africa top nations showed 16%~11% y-y value in 1995 by South Algeria~Ethiopia explained the Algeria forwards economy development step. The GDP value showed 44~8 billion dollars by them accordingly to express the Algeria strong economic strength in 1995. On the other side, Egypt retained 13.5% y-y value with 63 billion dollars GDP one to become the No. One position.

Figure 2. The GDP comparison between Africa top nations [1]

2.2 Top continent nations GDP like India Brazil Mexico

Top continent nations GDP like India Brazil Mexico showed 43%~20% y-y value in 1990 by Brazil~Mexico explained their most forwards economy development step. The GDP value showed 380~311 billion dollars by them accordingly to express their strong economic strength in 1990. on the other side, the Mexico showed 34% y-y value and 271 billion dollars in 1990 with the moderate one.

Figure 3. Top continent nations GDP. [2]

2.3 The 2026 latest nature index ranking Chinese universities

The 2026 latest Nature index ranking Chinese top twenty-one ~thirty universities would show 1,330~731 papers by Tianjin University ~ Chongqing University respectively exhibited Tianjin University strong R&D (research & development) capacity in Figure 1. Furthermore, the Nature Index will release the result through Springer Nature in order to trace each research institution's researchers in 145 journals independent evaluation contributing to selecting high-quality nature & science & sanitary science's research paper within December 2024 and November 2025.

Figure 1. The 2026 latest Nature index ranking top twenty-one ~thirty Chinese universities [3]

At the same time, the 2026 latest Nature index ranking Chinese top thirty-one ~forty-one universities would show 707~483 papers by Shenzhen University~Nanjing Technology University in Figure 2 respectively.

Figure 2. The 2026 latest Nature index ranking top thirty-one ~forty-one Chinese universities [3]

2.4 How about Chugai Pharmaceuticals

According to the Tencent News, the Chugai Pharmaceuticals created the new height with stock price to compare with 600 Japanese yuan within 1990~2013 for long time increased to attain 16 times with those years. Behind that value, there was the firstly created the thousand billion dollars' market value in Japan and Asian pharmaceutical business. By the time of February 25, 2026 the value attained the highly 108.7 billion dollars that not only made the Takeda Pharmaceutical company having 240 years historical experience and it entered the top 16 existing in the same line with the Sanofi & Regeneron pharmaceuticals. As knew the one thousand billion dollars market value members are still European & USA crossing giants where there are still not Asian pharmaceuticals all the time. [4] Thereby, we delighted to see that the

Takeda pharmaceuticals enhances its value up to former 20 in pharmaceuticals in the world as an Asian company. There will be more Asian ones to enter the top pharmaceutical business in future contributing to the society sanitation business.

3. Conclusions

As an indicator to nations economy development the GDP has an important influence to the economy level, quality aspects etc., so the comparing with other continents will have a significant meaning continuously by scientists who publish their latest achievement at the high impact-factor journal within a periodic time. We should look at the paper through internet web site even we can download the article for seeing later for the sake of erecting reading habits and information from there. Thereby, the one in journal will become a bridge connecting the readers and authors where the new method, approach may be seen by us. So that the high-technology product is able to be produced with those innovation method accounting for certain meaning new products which may stimulus the presently searching and producing ones because there is so thorough investigation to one property. We should continue to process those key parameter searching activity so that new functional product enables to be created in light of insistence and resilience measures. On the other hand, new quality productivity will be pushed from laboratory to industrial business like photovoltaic one, vehicle battery, hydrogen fuel etc. field, which may increase the corresponding industrial substitution those old energy usefulness for new quality energy. All of them may form the new industrial innovation with new transiting energy product which occupies the industrial production more and more. In future those new energy like generating the electrical amount has to dominate more ratio in GDP value. We must rapidly and urgently promote the new quality productivity from university lab to institution and industrial business for the sake of transforming the innovation energy into society quickly. On the other side, the more attracting the excellent talents from overseas university, institution & industry business will be done by us from now on. In light of News report the China R & D investment ratio is gradually increasing year by year, so there is more chance and equipment can match to proceed the new high-tech product preliminary investigation and promotion by recruiting others like USA top scientists who can transfer the USA top technique to China. We should go on processing those talents turn-back work from famous university etc. in overseas like USA accounting for new environmental formality to become the leadership role now.
